**KINGS OF KUSH FOLLOWS THE UPS
AND DOWNS OF 'CELEBRITY PITCHMAN'
ANTHONY SULLIVAN'S MISSION TO SET
UP A HEMP FARM IN VERMONT AND
BRING CBD PRODUCTS TO THE WORLD.**

It's a chaotically wild, hilarious yet heart-warming
story of a father's determination to improve his
daughter's life by creating the medicine she needs.

CHAOS CANNABIS COMEDY AND A CAN-DO ATTITUDE.

A household name in the US, “OxiClean guy” Anthony “Sully” Sullivan is taking on a brand new adventure. He’s setting up Montkush Farms - a 116-acre hemp farm in Vermont - to produce CBD oil, inspired by the life-changing health impact of the controversial cannabis extract on his young daughter, Devon.

With no farming experience and just passion, determination, his best friend Dave and a motley crew of locals to help him, it’s an emotional rollercoaster ride of trial, error, disappointment and triumph.

These buddies from the big city have faced incredible challenges and endurance tests before, but they’re fish out of water in Vermont. Nothing had prepared them for the madness of the battles against nature, the law and even their neighbours that setting up and launching a farm and CBD oil business would put them through.

FROM PITCHMAN TO PITCHFORK.

ANTHONY SULLIVAN

Anthony "Sully" Sullivan is the TV infomercial innovator who can pitch - and sell - anything. Now, he's on a passionate personal mission to pitch CBD oil - a medicinal extract made from cannabis plants - to the world... and he's growing the cannabis to make it himself.

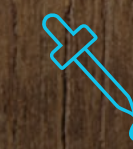

DAVE CHRISTIAN

TV adventure racer and entrepreneur Dave met Sully when the two took part in the World's Toughest Race challenge in Fiji. He's Sully's partner in the farm, and the two share a fantastic natural chemistry that brings humour and charm to the story.

IT'S ABOUT GETTING WELL, NOT ABOUT GETTING HIGH...

CBD is an extract derived from cannabis plants. CBD is made without THC - the hallucinogen element in cannabis that makes you feel 'high'.

In 2020, Cannabidiols represented a 3 billion dollar global industry, predicted to grow 200% by 2028.

CBD is commonly used to treat anxiety and depression, stress, diabetes, chronic pain, cancer and inflammation.
